

Time to Make SLIME

Goal: To understand that science takes place in the most fun things, including making slime!

Materials:

- 2 oz Elmer's glue
- $\frac{1}{4}$ tbsp baking soda
- $\frac{1}{2}$ tbsp contact lens solution
- 2 paper cups
- 1 spoon

Instructions:

1. Get into groups of 3-4.
2. Pour the glue into one of your paper cups, along with the baking soda.
3. Mix thoroughly until it is one solution.
4. Add the contact lens solution to the cup.
5. Mix thoroughly until the mixture hardens and slime begins to form
6. If it is too sticky, add more contact lens solution until it is slime consistency
