

Stocks

Goal: Invest money in different stocks, take risks, and make as much money as possible!

Instructions:

1. Everyone starts with \$1,000.
2. Figure out how much money you want to invest in different stocks.
The prices of 1 share for each stock are listed below:
Google - \$150
Apple - \$100
Amazon - \$200
Facebook - \$50
3. You don't have to invest all of your money!
4. Everyone takes turns randomly picking one of the cards.
5. Recalculate how much money you have based on the new stock price.
6. After each round, you can buy and sell your shares!
7. Keep track of your money using the tracking sheet. Keep track of the number of shares you have bought, the price of one share, the money you have not invested, and the total amount.
8. After 10 rounds, sell all your shares, and the person with the most money wins!

Cards

Google Stock Went Up \$5	Amazon Stock Went Up \$5	Apple Stock Went Up \$5	Facebook Stock Went Up \$5
